PROFESSIONAL SUMMARY

Java backend developer experienced in **Spring Boot** services and **REST APIs**, with projects using Spring Security, JPA/Hibernate, **MySQL**, Redis, asynchronous processing, and Docker; familiar with **AWS** and **Azure**.

EXPERIENCE

Software Engineer

Infosys

Sep 2025 - Present

Bengaluru, India

- Developed **10+ Spring Boot backend services** and **30+ REST APIs** for an Infosys client's education platform.
- Created tables and **SQL queries** to populate new tables from existing data according to business requirements.
- Reduced query latency to **100 ms** on **20,000 records** using **indexing** and **JOIN FETCH** to resolve **N+1 queries**.
- Built **SQL data transformation pipelines** to convert raw table data into analysis-ready datasets.
- Executed **40+ API test cases** with **REST Assured** and **Postman** to validate functionality and business rules.
- Wrote **unit tests** for business logic to cover expected behavior, edge cases, and failure scenarios.
- Collaborated with the development team to deliver **Jira**-tracked tasks and manage code changes using Git and **GitHub**.
- Created and configured **Dockerfiles** to containerize applications for deployment.

PROJECTS

Job Portal Application | Java 21, Spring Boot, Spring Security, MySQL, Redis, Docker, NGINX

[GitHub](#)

- Built job, profile, and application workflows with **Spring Data JPA** and **MySQL**; enforced **Spring Security RBAC**, BCrypt password hashing, CSRF protection, and recruiter ownership checks.
- Added **Redis caching** with TTLs, resume fingerprints, job-index versioning, and cache-failure fallback; coordinated background **indexing** with an expiring **distributed lock**.
- Built an **asynchronous recommendation system** using **@Async**, **CompletableFuture**, PDFBox, Spring AI/Ollama, and Pinecone, returning the **top 5** job matches as JSON.
- Deployed two **Docker Compose** app instances behind **NGINX** sticky load balancing; load-tested up to **1,000 virtual users** with k6, processing **7,196 HTTP requests** at a **0% HTTP request failure rate**.

Blog App | Java, Spring Boot, Spring Data JPA, REST APIs, Maven

[GitHub](#)

- Developed **REST APIs** to create, retrieve, update, and delete blog posts using a controller-service-repository architecture.
- Added author/title search, **Spring Data JPA pagination**, and author-existence validation for new posts.

Ecommerce Application - Auth Service | Java, Spring Boot, Spring Data JPA, Jakarta Validation, JUnit 5, MockMvc

[GitHub](#)

- Built a user registration workflow using a **ports-and-adapters architecture**, with email normalization, duplicate email checks, password validation, and secure password hashing.
- Implemented centralized API error handling using **@RestControllerAdvice** and **ProblemDetail**, and wrote **JUnit 5** and **MockMvc** tests to verify **HTTP 400 and 409** responses.

TECHNICAL SKILLS

Languages & Core: Java 21, SQL, OOP, Java Collections, dependency injection

Backend & Security: Spring Boot, Spring MVC, REST APIs, Spring Security, RBAC, BCrypt, CSRF

Data & Concurrency: MySQL, JPA/Hibernate, SQL joins, Redis, CompletableFuture, @Async

API Design: Pagination, input validation, exception handling, layered architecture

Cloud & Deployment: AWS, Azure, Docker, Docker Compose, NGINX, load balancing

Testing & Tools: JUnit 5, MockMvc, REST Assured, Postman, k6, Maven, Git, GitHub, Jira

Problem Solving: Solved **600+** coding problems across platforms, including **470+** on LeetCode

AI Fundamentals: Basic AI, generative AI, applied AI (beginner); Spring AI integration

EDUCATION

Nitte Meenakshi Institute of Technology

Bachelor of Engineering in Electronics and Communication Engineering

Bengaluru, India

2021 - 2025

- CGPA: **7.65/10**
